# U.S. Federal Radon Action Plan: Current and Proposed Initiatives

<table>
<thead>
<tr>
<th>Agency</th>
<th>Current Rn Actions</th>
<th>Federal Rn Action Plan</th>
</tr>
</thead>
</table>
| U.S. Department of Agriculture (USDA)\(^1,2\) | • EPA agreement/support for Cooperative Extension Service (CES) Healthy Homes outreach, poster contest, Rn action week, etc.  
• Developed Rn guidance for federal land managers, specifically **Rehabilitating Affordable Rural Housing**\(^3\) | • *Demonstrate* (none specified)  
• **Address Finance** |  
• USDA will develop working agreements with nonprofits that can assist 504 home repair grantees and loan recipients in funding mitigation efforts whenever Rn is found at > 4 pCi/L action level  
• USDA will educate Rural Housing Guarantee Program lenders and State Housing Finance Authorities about Rn risks and encourage the testing of Zones 1 and 2 existing homes  
• USDA will leverage financing through renovation/repair programs and essential community programs to test and mitigate radon in schools and daycare facilities |  
• **Build Demand**  
• CES will focus testing outreach on new and existing Rural Housing financed properties  
• USDA will educate multifamily housing developers about Rn risks and what construction mitigation strategies can be used when Rn is found  
• USDA will promote Rn testing and mitigation through [Rural Development’s Housing and Community Facilities Programs](https://www.rd.usda.gov/about-md/rural-development/housing-community-facilities)  
• Build Demand  
• CES will focus testing outreach on new and existing Rural Housing financed properties  
• USDA will educate multifamily housing developers about Rn risks and what construction mitigation strategies can be used when Rn is found  
• USDA will promote Rn testing and mitigation through [Rural Development’s Housing and Community Facilities Programs](https://www.rd.usda.gov/about-md/rural-development/housing-community-facilities) |  
• Demonstrate (none specified)  
• Address Finance |  
• DOD will develop a communications campaign to educate all personnel – living both on and off base – about the health risks associated with radon exposure and solutions to address these risks  
• **Address Finance** (none specified)  
• **Build Demand**  
• DOD will review and update, as appropriate, the [Unified Facility Criteria](https://www.wbdg.org/ccb/DOD/UFC/ufc_4_740_14.pdf) to reflect current standards for Rn measurement, mitigation, and Rn-resistant new construction for low rise buildings (e.g., multifamily, schools, daycare facilities)  
• DOD will identify the universe of low-rise buildings in EPA Zone 1 areas and, for those buildings not previously addressed, develop a testing and mitigation plan for those at or above the EPA’s 4 pCi/L action level  
• Demonstrate (none specified)  
• Build Demand  
• DOD will develop a communications campaign to educate all personnel – living both on and off base – about the health risks associated with radon exposure and solutions to address these risks  
• **Address Finance** (none specified) |  
• Demonstrate (none specified)

| Demonstrate (none specified) | Demonstrate |
| Address Finance (none specified) | HHS will work to increase Rn awareness among states participating in the National Comprehensive Cancer Control Program (CDC Division of Cancer Prevention and Control) |
| Build Demand | HHS and EPA will explore including Rn in environmental health tracking (CDC’s National Center for Environmental Health) |
| | HHS will update the current Toxicological Profile for Radon (Agency for Toxic Substances and Disease Registry) |
| | Address Finance (none specified) |
| | Build Demand (none specified) |

7 DOE WAP contact: (unknown)
8 The overall WAP evaluation, of which Rn is a small part, is described at [weatherization.ornl.gov/evaluation_nr.shtml](http://weatherization.ornl.gov/evaluation_nr.shtml) Follow and search for radon to see more details.
10 HHS contact: (unknown)
### U.S. Department of Housing and Urban Development (HUD)\(^1\)

- HUD incorporated Rn into its healthy homes strategic plan, *Leading Our Nation to Healthier Homes*. HUD’s Office of Healthy Homes is seeking increased collaboration with other HUD offices that oversee housing assistance and mortgage programs to promote Rn testing and mitigation.
- A Radon and Mold Release Agreement (HUD-9548-E) is required in all sales contracts for HUD-acquired single family properties
- A HUD form, discussing Rn and home inspections (HUD-92564-CN), is required\(^2\) to be provided by mortgagees to prospective homebuyers at first contact for all new transactions involving single family FHA mortgage insurance on existing property
- HUD Section 203(k) mortgage financing program is HUD’s primary tool for rehabilitating and improving single family homes (allows) home buyers to finance purchase and repair or improvement of a home using a single mortgage loan; reducing Rn levels in a home can be financed\(^3\) through the Section 203(k) program

### U.S. Department of Interior (DOI)\(^5\)

- The U.S. Fish and Wildlife Service has a Rn policy for measurement and mitigation for owned or leased buildings and non-public water sources
- The U.S. Fish and Wildlife Service has a Hazard Communication Program which provides a framework for providing health and safety information and training for special emphasis programs, including Rn
- Demonstrate
  - DOE will send a message on the hazards of Rn to its approximately 70,000 employees
- Address Finance (none specified)
- Build Demand
  - DOI, through the National Park Service, will test approximately 5,000 residential units for Rn
  - DOI, through the Bureau of Indian Affairs, will test approximately 3,500 residential units and 500 schools, and will work with Tribes to increase awareness of the Rn risk

### U.S. Department of Veterans Affairs (VA)\(^6\)

- The VA Home Loan Guaranty program tends to be guided by HUD policy on Rn testing and mitigation
- VA is reviewing its real estate valuation/appraisal procedures to account for Rn
- Demonstrate (none specified)
- Address Finance
  - U.S. Department of Veteran Affairs (VA) will promote Rn testing and mitigation through a comprehensive disclosure of the Rn health risk to borrowers
- Build Demand (none specified)

---

\(^1\) HUD contact: (unknown)
\(^2\) Since circa 2004
\(^3\) Circa 1992 research by NJ indicated that there is little demand for mitigation loans although the fact that FHA 203(k) financing is available may indirectly help to increase the acceptability of mitigation in the lending community (WA)
\(^4\) Pilot program under Federal housing Administration (FHA); $25,000 per creditworthy homeowner, 5 to 7%, 20 years
\(^5\) DOI WAP contact: (unknown); DOI has had a long history of testing DOI owned or leased facilities for Rn and published the results of their Rn efforts (unlike many other federal agencies)
\(^6\) VA contact: (unknown)
<table>
<thead>
<tr>
<th>U.S. Environmental Protection Agency (EPA)</th>
<th>U.S. General Services Administration (GSA)</th>
</tr>
</thead>
</table>
| • EPA provides the scientific foundation on Rn, and facilitates the development of technical guidance, protocols and standards needed for risk reduction  
• EPA provides $8 million in radon grants to states and tribes each year to fund state-wide Rn risk reduction programs  
• EPA supports outreach and education campaigns, as well as partnerships with states, tribes, NGOs and the Rn services industry. | • Demonstrate  
• EPA, HUD, USDA, and HHS will collaborate on an interagency Rn outreach initiative that builds on existing campaigns addressing home-based risks and or healthy homes  
• EPA, HUD and USDA will engage the philanthropic community to support Rn risk reduction in the context of their support for local healthy homes programs  
• EPA and Treasury will work together to facilitate the deductibility of Rn testing/mitigation costs within Health Spending Accounts  
• Address Finance (none specified)  
• Build Demand (none specified) |
| • GSA conducts Rn testing in all of its leased and new-owned buildings. If levels are found to be at or above the EPA Rn action level of 4 pCi/L during testing, the property must be mitigated and retested following the mitigation  
• Rn services are included in two GSA Schedules | • Demonstrate (none specified)  
• Address Finance (none specified)  
• Build Demand  
• GSA will explore testing for Rn and mitigating high levels in childcare facilities through the Federal Real Property Program  
• GSA will promote professional Rn services to federal tenants |

---

17 EPA staff contact: Katrin Kral  
Krl.Katrin@epamail.epa.gov 202-343-9454

18 GSA contact: (unknown)

19 GSA has had an active Rn testing and mitigation program since 1989 but unfortunately not much of this work has been published.
