

NATIONAL RADON POSTER CONTEST

Test. Fix. Save A Life.

Students ages 9-14 are eligible to participate in the annual National Radon Poster Contest.

They submit artwork designed to raise awareness about radon and encourage radon testing in every home.

The top national winners receive monetary awards, and have their designs used to raise awareness about the importance of testing homes for radon.

Kansas State University coordinates the National Radon Poster Contest under the National Radon Program Services cooperative agreement with EPA.
